Argyle Duvet Cover – A Review On The Green Argyle Pattern Queen / Full Duvet Cover

I am a shopaholic person and one of my weaknesses is to add my collection of fashionable dresses and wardrobes, and of course my bed's duvet covers. My latest buy was an **Argyle duvet cover** which I purchased in visonbedding.com, an online shop that sells a great deal of bedding coordinates.

In this article, I will be reviewing a particular Argyle duvet cover – the Green Argyle Pattern Queen / Full Duvet Cover.

Writing this review is made easier because I have this particular cover at home and sleeping on it is a matter of experience that will help me complete this unbiased review of this specific cover.

As for the features and characteristic, you would simply love the plushy and Microsoft fabric that this cover is made from. This will provide you with a tender and soft caress on your skin and touch as it is used for the top of your bedding.

And since it is soft and breathable, sleeping on it is a nice experience as it provides you with the utmost comfort that is actually one of the best qualities a shopper must be looking for in a cover. This is possible because of the 100 % sateen cotton that this cover is made up. The black and white part of this cover is used in the bottom layer of the bedding.

Working on with this type of cover gives you the convenience that you are actually looking for. With the invisible cover opening, insertion and removal of your comforter has been made easier for you.

At first, I was skeptical to have it because of the prints that come with it. There are other covers in my collection which have prints that are screened. With the Green Argyle Pattern Queen / Full Duvet Cover, you are assured that the texture of the fabric is completely soft and plushy as the prints are not altered by screened printing processes or anything.

With its versatile dimensions of 87" x 87" or 221 cm x 221cm, it can fit to almost all types of full size or queen size beds.

Cleaning this piece is not a problem, too because it can be washed in a washing machine (gentle cycle and in cold water); can be tumbled dry on a low or minimum temperature.

If you want an **Argyle duvet cover**, try the Green Argyle Pattern Queen / Full Duvet Cover and you will never regret.
